☒ Initial Privileges (appointment)
☒ Renewal of Privileges (reappointment)

Applicant: Check the box for each privilege requested. Applicants have the burden of producing information deemed adequate by the hospital for a proper evaluation of current competence, current clinical activity, and other qualifications and for resolving any doubts related to qualifications for requested privileges.

Chief of Service and/or Division Chief: Check and initial the privileges requested and include your recommended plan for Focused Professional Practice Evaluation. If recommended with conditions or not recommended, provide the condition or explanation on the last page of the form.

Other Requirements:

- Note that privileges granted may only be exercised at the site(s) and/or settings(s) that have sufficient space, equipment, staffing, and other resources required to support the privilege.
- This document is focused on defining the qualifications related to competency to exercise clinical privileges. The applicant must also adhere to any additional organizational, regulatory, or accreditation requirement that the organization is obligated to meet.

QUALIFICATIONS FOR OTOLARYNGOLOGY

Initial privileges: To be eligible to apply for privileges in Otolaryngology, the applicant must meet the following criteria:

Successful completion of an Accreditation Council for Graduate Medical Education (ACGME) or American Osteopathic Association (AOA) accredited residency in Otolaryngology.

AND/OR

Current subspecialty certification or active participation in the examination process (within achievement of certification within five years of graduation leading to certification in otolaryngology by the American Board of Otolaryngology or the American Osteopathic Board of Otolaryngology—Head and Neck Surgery.

Required current experience: At least 20 Otolaryngologic surgery procedures, reflective of the scope of privileges requested, during the past 12 months or successful completion of an ACGME- or AOA-accredited residency or clinical fellowship within the past 12 months.

Renewal of privileges: To be eligible to renew privileges in otolaryngology, the applicant must meet the following criteria:
Current demonstrated competence and an adequate volume of experience (20 otolaryngology surgery procedures) with acceptable results, reflective of the scope of privileges requested, for the past 24 months based on results of ongoing professional practice evaluation and outcomes. Evidence of current physical and mental ability to perform privileges requested is required of all applicants for renewal of privileges.

esophagectomy, Zenker’s diverticulum surgery (open and endoscopic), mediastinal exploration/dissection, cricopharyngeal myotomy/myectomy, revision stenotic tracheostoma, partial/total pharyngectomy, and pharyngeal reconstruction

☐ Surgical removal of teeth in association with radical resection
☐ Tonsillectomy and adenoidectomy
☐ Use of Laser as an adjunct to privileged procedures

QUALIFICATIONS FOR NEUROTOLOGY

Initial privileges: To be eligible to apply for privileges in neurotology, the applicant must meet the following criteria:

Successful completion of an ACGME- or AOA-accredited residency in otolaryngology, followed by successful completion of an accredited fellowship in neurotology.

AND/OR

Current subspecialty certification or active participation in the examination process (with achievement of certification within 5 years) leading to subspecialty certification in neurotology by the American Board of Otolaryngology.

Renewal of privileges: Current demonstrated competence and an adequate volume of experience (including otolaryngology surgery procedures) with acceptable results, reflective of the scope of privileges requested, for the past 24 months based on results of ongoing professional practice evaluation and outcomes. Evidence of current physical and mental ability to perform privileges requested is required of all applicants for renewal of privileges.

To the applicant: Core Privileges in Neurotology—Core privileges in Neurotology include admit, evaluate, diagnose, treat, and provide consultation to patients of all ages presenting with diseases of the ear and temporal bone, lateral skull base, and related structures, including disorders of hearing and balance. Includes medical and surgical management skills for the care of diseases and disorders of the petrous apex, infratemporal fossa, internal auditory canals, cranial nerves, and lateral skull base in conjunction with neurological surgery. May provide care to patients in the intensive care setting in conformance with unit policies. Assess, stabilize, and determine the disposition of patients with emergent conditions consistent with medical staff policy regarding emergency and consultative call services. The core privileges in this specialty include the procedures on the attached procedures list and such other procedures that are extensions of the same techniques and skills.

☐ Performance of history and physical exam
Please initial in this column and check off the appropriate box for the privileges you are requesting.

- Acoustic neuroma surgery
- Cochlear implantation
- Facial nerve decompression
- Decompression membranous labyrinth cochleosacculotomy, encolymphatic sac operation
- Electrophysiologic monitoring of cranial nerves VII, VIII, X, XI and XII
- Excision of glomus tumor
- Excision of skull base tumor
- Labyrinthectomy
- Tympanoplasty and Mastoidectomy
- Mid-/post fossa skull base surgery
- Osseo integrated implants (for auricular prosthesis and for bone-anchored hearing aids)
- Petrous apiectomy plus radical mastoid
- Reconstruction congenital aural atresia
- Repair of fistula (ovale and round window)
- Resection of cerebellopontine angle tumors
- Stapedectomy
- Temporal bone resection
- VII nerve repair/substitution
- VIII nerve section
- Use of laser in any temporal bone or skull base operation
- Placement of implantable hearing aids into the temporal bone
- Harvest of nerve, cartilage, fat, or muscle grafts for use in temporal bone or skull base surgery

SPECIAL NON CORE PROCEDURES/TECHNIQUES
To be eligible to apply for a special procedure listed below, the applicant must demonstrate an acceptable combination of education and clinical experience. As a basic requirement for privileges in these categories, applicants must provide evidence of formal training and direct clinical experience that relates to the types of patients for whom privileges are being requested. Experience of this nature may be gained through a graduated program of practice under the supervision of an experienced subspecialist; through successful completion of an approved, recognized course of continuing medical education; through supervised training in residency, fellowship or other graduate medical education experience; and provide documentation of competence in performing that class of procedures consistent with the criteria set forth in medical staff policies governing the exercise of specific privileges.
Robotic Surgery – Must meet the requirements of certification and proctoring,

Administration of Sedation and Analgesia – Requirements are current BLS/ACLS and completion of the Department of Anesthesiology requirements.

Administration of Chemotherapeutic Drugs – Please specify in the area below:

I understand that as a member of the Medical Staff, I shall, in an emergency, be authorized to treat any medical diseases and/or perform any medical or surgical procedures indicated. An emergency, for these purposes, is defined as any situation in which any delay in administering treatment would result in serious harm to the patient or an immediate threat to the life of the patient.
