

# Breastfeeding is the BEST feeding.

Nutritious. Comforting. Convenient. Immune Building.

**Ten Steps to Successful Breastfeeding**, practiced at University Hospital, is the basis of the **Baby-Friendly Hospital Initiative**, a worldwide breastfeeding quality-improvement project created by the World Health Organization (WHO) and the United Nations Children's Fund (UNICEF).

## **Ten Steps to Successful Breastfeeding means that every facility providing maternity services and care for newborn infants should:**

1. Have a written breastfeeding policy that is routinely communicated to all health care staff.
2. Train all health care staff in skills necessary to implement this policy.
3. Inform all pregnant women about the benefits and management of breastfeeding.
4. Help mothers initiate breastfeeding within one hour of birth.
5. Show mothers how to breastfeed, and how to maintain lactation even if they should be separated from their infants.
6. Give newborn infants no food or drink other than breast milk, unless medically indicated.
7. Practice rooming-in - that is, allow mothers and infants to remain together 24 hours a day.
8. Encourage breastfeeding on demand.
9. Give no artificial teats or pacifiers (also called dummies or soothers) to breastfeeding infants.
10. Foster the establishment of breastfeeding support groups and refer mothers to them on discharge from the hospital or clinic.

Baby-Friendly hospitals and birth centers also uphold the International Code of Marketing of Breast Milk Substitutes by offering parents support, education, and educational materials that promote the use of human milk rather than other infant food or drinks, and by refusing to accept or distribute free or subsidized supplies of breastmilk substitutes, nipples, and other feeding devices.
